# **HE HOMAG**

# Big can be that small.

**Our CNC Processing Center** 

DRILLTEQ V-200

**YOUR SOLUTION** 

# DRILLTEQ V-200 – big can be that small.

Fast processing – saves time
Takes up little room – saves space
Simple operation – saves nerves
Great value for money – saves money

Our CNC processing centers offer the technology of the future today. And with good reason: Tradition. For us, it is both a motivation and a commitment. Customers the world over associate the very highest standards with this. And we meet those expectations.

### **YOUR SOLUTION**

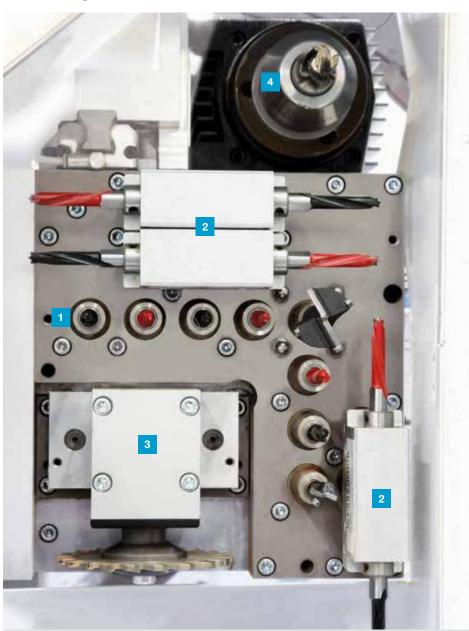

### **MORE: HOMAG.COM**

### **CONTENTS**

- **04** Configurations
- **06** All inclusive Hardware
- 08 Option Plausibility Check
- Option Length-depending processing in X-direction
- 10 Options | Application examples | Everything at a glance
- 12 Option Robot Connection
- 14 All inclusive Software
- 15 Option Software
- 16 powerTouch2 | tapio
- 18 Life Cycle Services
- 19 Technical Data

# Package 1

### 1 Vertical drilling

- 8 High-speed drilling spindles, incl. quick change drilling system
- 3 Grooving
  - Grooving saw in X-direction, Ø 100 mm

### 2 Horizontal drilling

- 4 High-speed drilling spindles in X-direction
- 2 High-speed drilling spindles in Y-direction

### 4 Routing

 Router motor with hydraulic quick-change system,
 5 kW ETP 25

# Package 2

### 1 Vertical drilling

- 13 High-speed drilling spindles, incl. quick change drilling system
- 3 Grooving
  - Grooving saw in X-direction,
     Ø 100 mm

# Package 3

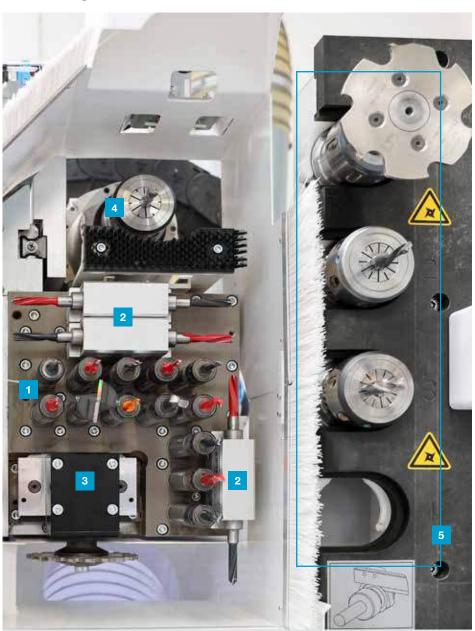

### **Horizontal drilling**

- 4 High-speed drilling spindles in X-direction
- 2 High-speed drilling spindles in Y-direction

### **Routing**

• Router motor with hydraulic quick-change system, 5 kW ETP 25

### Vertical drilling

• 13 High-speed drilling spindles, incl. quick change drilling system

### Grooving

• Grooving saw in X-direction, Ø 100 mm

### **Tool changer**

 Automatic tool change magazine with 4 places

### **Horizontal drilling**

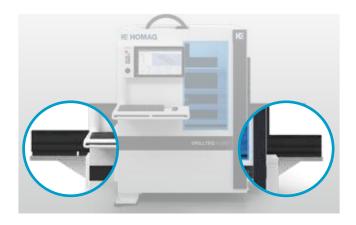

- 4 High-speed drilling spindles in X-direction
- 2 High-speed drilling spindles in Y-direction

### Routing

 Tool changing spindle 10 kW HSK 63

# All inclusive - Hardware

**TOP EQUIPMENT RIGHT FROM THE BEGINNING:** Already in the standard elementary technologies are included, which ensure sustainable highest processing quality.

### Workpiece load- and workpiece removal area

 Mechanical support via roller conveyor in the loading- and removal area of the machine

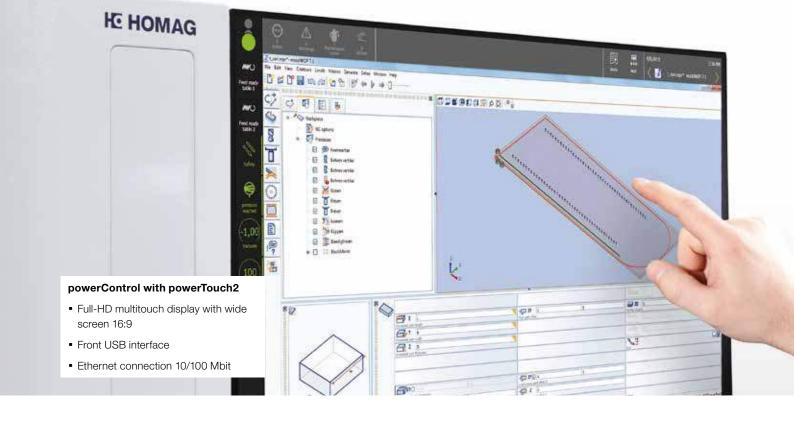

### Working length extension

 Extension of the working length from 2500 to 3050 mm incl. roller conveyor

### Automatic workpiece thickness adjustment

 Automatic adjustment of the counter block to the material thickness according to the data preselected by the operator in woodWOP

### Drill quick-change system

The patented system ensures easy installation or change of drilling bits. Your easy way to save time!

### Automatic spindle clamping

- Patented system for exact drilling depth at any time with different materials
- Lasting assurance of drilling quality

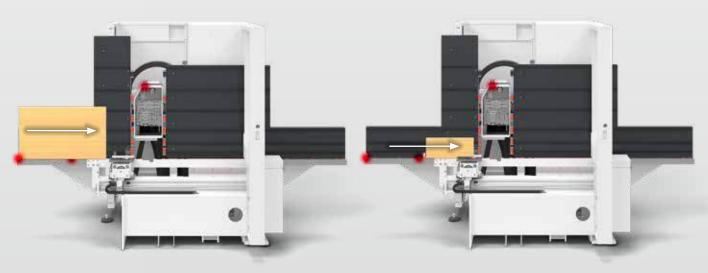

### Workpiece clamping device

• Easy adjustment of the clamping device (manually) to the workpiece thickness (clamping device stroke 10 mm). For differences in the workpiece thickness of up to 10 mm it is not necessary to manually adjust the clamping device.

# Option - Plausibility Check

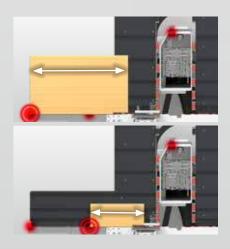

### BENEFIT FROM ADDITIONAL SAFEGUARDING OF PROCESSES

Control of the workpiece by sensor technology in X- and Y-direction. Comparison with the values in the database. If the defined tolerance value is exceeded, the current process stops. At the same time the operator receives a message to correct the workpiece. This way you remain on the safe side.

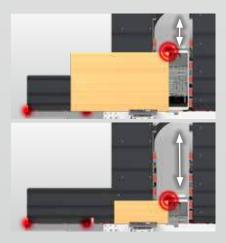

### Step 1:

Positioning the workpiece

### Step 2

 Control of the workpiece by sensor technology in X-direction. Depending on the workpiece dimensions the shortest distance to the next sensor is selected.

### Step 3:

 Control of the workpiece by sensor technology in Y-direction

### Step 4:

- Balancing the determined values with the program data:
- Tolerance of values < 5 mm Program is continued.
- Tolerance of values > 5 mm Program is stopped, advice to the operator to carry out the corrections.

# Option – Length-depending processing in X-direction

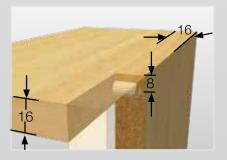

### **AUTOMATIC ADJUSTMENT OF DRILLINGS DEPENDING ON WORKPIECE DIMENSIONS**

After the workpiece has been released for processing its length is measured accurately by a measuring run. Dimension-depending drillings are then corrected automatically by possibly determined tolerances. You save time and gain quality.

 Determination of exact workpiece lengt (value 2).

 Drills depending on dimensions are then automatically corrected by possibly determined tolerances.

# Options

### Option suction hood

• Enhancement of the suction power in the area of the routing unit for larger cutting cross-sections

### **Option Clamex routing**

- Horizontal processing with Clamex disc router
- Vertical processing with Clamex end mill

# Everything at a glance...

# Option – Robot Connection

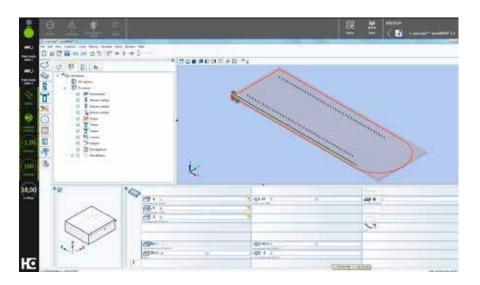

DRILLTEQ V-200 with robot. Safe, precise, automatic handling of workpieces for more efficient production.

### All inclusive - Software

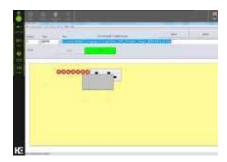

**WITH THIS SOFTWARE PACKAGE YOU ARE »READY TO RACE«.** You will receive one of the most established CNC-programming systems, the woodWOP software, which has proven itself by more than 30.000 installations worldwide.

### woodWOP | License Machine

- Fast and intuitive operation thanks to simple, direct navigation
- Select from a choice of variables for flexible variable programming
- Quickly create individual subprograms
- Increased programming security through 3D images of workpieces, processing and clamping equipment

### Slot assignment

- Simple control of main machine functions through soft keys
- Graphical configuration
- Automatic mirroring of workpieces

### woodWOP DXF Basic

- Interface for CAD-Data Import
- Basis to generate woodWOP programs

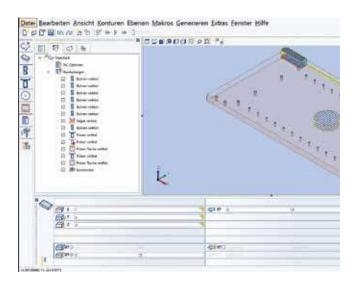

### Machine data acquisition MMR Basic

- Record quantities and actual operating times on the machine
- Integrated maintenance instructions for optimum time and quantity-based planning, as well as performing maintenance

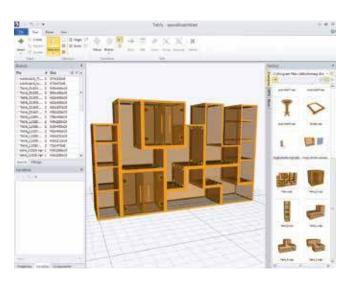

# Option - Software

WITH ADDITIONAL SOFTWARE MODULES you can further optimize your processes.

### woodWOP | License Office

- Single user or network licenses available
- Incl. DXF-Import CAD-Plugin to create your own CAD drawings on the machine and at the workplace

### woodAssembler

- To visualize woodWOP programs (MPR) in 3D
- Enables the construction of individual workpieces to finished objects

### 3D CNC-Simulator

- Simulates the processing acc. to the order set in the NC program
- Allows time calculation

### **ADDITIONAL SOFTWARE**

- 1. woodWOP Office
- 2. 3D CNC-Simulator
- 3. woodAssembler

Package

# The next generation of powerTouch: powerTouch2

Faster, more comfortable, clearer: Enjoy the benefits of our further improved powerTouch user interface. We have optimized our standardized operating concept and further adapted it to our customers' requirements. Controlling your HOMAG machines is now even faster and more intuitive. The new, modern design has a clear structure. The innovative touch operation allows you to achieve the desired result easily and comfortably.

With the new powerTouch generation, you can enter information at your machine even more quickly. Compared to the previous version, you can achieve a time saving of up to 30%. This is possible thanks to new features, such as automatic word completion, a pop-up keyboard that can be kept open and Windows-like functions, such as the selection of common actions directly via the start button.

Our successful powerTouch philosophy – standardized, simple, ergonomic, evolutionary – consistently further developed

- The powerTouch2 screen is clearly structured.
  You can see all the important information at a glance, but you still have all the details.
- A functional pop-up keyboard that can be kept open, including automatic word completion for faster entries (when you enter the first letters, frequently used applications are proposed and you can select them directly).
- We have also improved the traffic light dialog further. You can now directly influence the machine's production readiness by selecting actions via the traffic light icon.
- 4 Enhanced "Start" menu with additional information displayed (e.g. an indication of how many messages are currently pending or status bars that show the progress of the application) and direct access to actions (e.g. confirmation of actions without having to jump to the application).

# Apps that make working life easier.

### DataSave

- Protects machine and configuration expertise
- Faster service for machine breakdowns
- Saves time when restarting production
- Saves on maintenance costs
- Automatic backups of several machines

### ServiceBoard

- Create service cases quickly and easily and send them to the correct service partner
- Live video diagnostics to solve service cases with image support
- Video reduces the language and distance barriers
- Also works without a machine connection to tapio (and is therefore ideal for older machines)

### MachineBoard

- Push notifications
- Machine data and status can be viewed from anywhere in real time
- Lists of errors, warnings, maintenance tasks and actions
- Displays the remaining time until the next intervention by the machine operator

Free demo for all tapio apps, no registration required. Simply download and test.

# tapio is the open wood industry ecosystem

This means that everyone involved in the wood industry can participate. Because together with our business partners, we develop digital solutions for everyone.

For you more than...

1,350

service employees worldwide

92 %

less on-site service thanks to successful remote diagnosis

5,000

customers in trainings / year

150,000

machines, all electronically documented in 28 different languages – in eParts

# HE LIFE CYCLE SERVICES

Optimal service and individual consultations are included in the purchase of our machines. We support you with service innovations and products which are especially tailored to your requirements. With short response times and fast customer solutions we guarantee consistently high availability and economic production – over the entire life cycle of your machine.

### **TELESERVICE**

- Hotline support via remote diagnosis by our trained experts regarding control, mechanics and process technology.
   Thus, more than 92% less on-site service required and consequently a faster solution for you!
- The ServiceBoard App helps to solve tasks in a fast, simple and concrete way. This is achieved by mobile live video diagnosis, automatic sending of service requests or the online spare parts catalog eParts.

### **SPARE PARTS SERVICE**

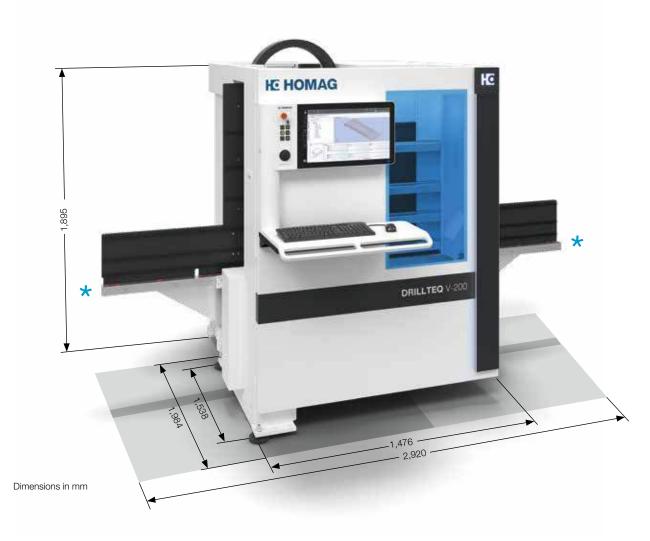

- High spare parts availability and fast delivery.
- Ensuring quality by predefined spare parts and wear parts kits, comprising original spare parts.
- Identify and inquire for spare parts online under www.eParts.de 24/7, or buy even faster and more comfortably in the new HOMAG eShop (shop.homag.com).

### FIELD SERVICE

- Increased machine availability and product quality by certified service staff.
- Regular checks through maintenance/ inspection guarantee the highest quality of your products.
- We offer you the highest availability of technicians in order to reduce downtimes in case of unpredictable troubles.

# Technical Data

\* A corresponding safety distance must be maintained in the in and outfeed direction! (See documentation)

TECHNICAL DATA			
Workpiece dimensions max.	LxWxT	mm	2,500 x 850 x 60 / optional 3,050
Workpiece dimensions min.	LxWxT	mm	200 x 70 x 12
Vector speed		m/min	(X - Y) 50 - (Z) 15
Compressed air required		bar	7
Compressed air connection		inch	R 1/2
Dust extraction port		mm	Ø 160
Dust extraction volume		m³/h	min. 2,170
Electrical power – total connection load		kW	11,5
Total machine weight		kg	approx. 1,580
